AlertSystems Ltd – Company Profile

AlertSystems is an independent, Private Limited Company. We're very much a family business, run by the founders, Terry and Mandy Brake (Chairman and Company Secretary) and have been successfully trading since 1986. Other family members also work within the organisation, with Paul Brake being our Sales Director.

From the beginning our vision has been to provide customers with effective and reliable solutions to security problems, with a quality of installation and after sales care that sets us apart from our competitors.

We are immensely proud of the reputation we have gained within our industry and are recognised as one of the leading Independent Security specialists, over 5000 installations, fully supported with service and maintenance backup - nationwide.

We employ over 100 members of staff, a combination of sales, technical and administrative, a great number of whom have been with AlertSystems for many years, some even since the conception of the Company. It is an enviable record of staff retention which simply endorses the emphasis on the "family" structure of the Company.

It all began with our unique External Deterrent System, which is now recognised as the benchmark standard security solution for protection of external areas. British Standard BS 7992:2002 for Exterior Deterrent Systems was written using our product as the template for design and functionality.

In November 2001 we moved into our purpose built Head Office in Trowbridge, Wiltshire, where all our existing and prospective customers are most welcome to visit to see what makes us tick. We have a comprehensive demonstration facility here, which enables all our customers to view our product range and the security solutions we offer. We also have a mobile demonstration unit and can visit you and show you the quality of our products at your own premises.

Our Product Range:

External Deterrent Systems

Closed Circuit Television - CCTV (Rapid/Speed Dome Cameras)

Intruder and Fire Alarm Systems

Remote Monitoring of CCTV & Alarm Systems

Access Control & Intercoms - including Gate, Barrier & Turnstile Systems

Feel free to contact AlertSystems for details or demonstrations of any of our products and services.
