Mr R Porsz - Director
Alert Systems Ltd
Alert House
1 Willowside Park
Trowbridge
Wiltshire BA14 8RH

Dear Mr Porsz,

Alert Systems External Perimeter Alarm

It was a pleasure speaking to you today, time passes so quickly that I had not realised that we have been a customer of yours for such a long time (probably in excess of 17 years!). In that time we have upgraded a couple of times and it is a testament to the quality and utility of the system that having reached the end of the latest lease we are buying it from you and you are happy to offer a continuing service agreement.

As you know our original reasoning for acquiring the system was in response to a burglary which was costly both in terms of damage and disruption. Our isolated location has proved ideal for the lights/voice warning/flashing lights active deterrent and, thus far, in the years since the original installation, we have not had to make any burglary or vandalism insurance claims. I would further suggest that, in the light of local police forces decision to no longer attend reports of burglar alarms going off, the unique active and disorientating Alert System response to a perimeter intrusion is a very major advantage over a largely passive internal alarm system which will only respond, if at all, after the damage is done.

I am more than happy to offer my endorsement to an excellent product which, "does exactly as it says on the tin"!

Yours sincerely
W.J.MORRAY ENGINEERING LTD
