2 June 2009

Dear John,

Just a note to express my thanks for the work carried out by Alertsystems at our surgery.

The wireless intruder system was just as you promised, installed with a minimum of mess and at no compromise to the building's aesthetics. A real bonus is its ease of use.

On the occasions that I have needed to contact Alertsystems, my questions have been answered quickly by friendly, knowledgeable staff. When your engineers have visited, they have been prompt and efficient.

It is always good when we take on a new supplier and we get the service we were promised (this is not always the case!).

Please pass on my comments to all those involved.

Yours sincerely

Edward Cronin B.D.S.
